ADVANCES IN
POLYMER
TECHNOLOGY

JOURNAL OF
The Polymer Processing Institute

The Polymer Processing Institute (PPI) is an independent research corporation headquartered at NJ Institute of Technology with strong links to the Institute of Polymer Technology and materials engineering of Loughborough University (UK). Its mission is to assist industry by advancing knowledge in the field of Polymer Technology and related areas through sponsored research, development, and education, and to disseminate information via all appropriate mechanisms for technology transfer.

Contents of Volume 22

Number 1, Spring 2003

FEATURES

Parameters Affecting the Full-Shot Molding of Gas-Assisted Injection-Molded Parts 1
Shih-Jung Liu and Kuang-Huei Chang

Degradation Kinetics of Meta- and Para-Aromatic Polyamides 15
Arturo Horta, José Coca, and Fernando V. Díez

2-D Numerical Simulation of Differential Viscoelastic Fluids in a Single-Screw Continuous Mixer: Application of Viscoelastic Finite Element Methods 22
Robin K. Connelly and Jozef L. Kokini

3-D Modeling Reactive Molding Processes: From Tool Development to Industrial Application 42
Robert Sekula, Piotr Saj, Tomasz Nowak, Karol Kaczmarek, Kimmo Forsman, Aimo Rautiainen, and Josef Grindling

The Hydroxypropylation of Starch in a Self-Wiping Twin Screw Extruder 56
Robbert A. de Graaf and Leon P. B. M. Janssen

Heat Transfer Issues in Foam Extrusion 69
David B. Todd

DEPARTMENTS

News from the Polymer Processing Institute 75

Number 2, Summer 2003

FEATURES

Plastic Energy Dissipation and Its Role on Heating/Melting of Single-Component Polymers and Multi-Component Polymer Blends 85
Bainian Qian, David B. Todd, and Costas G. Gogos

Synergistic Effects of Carbon Fillers on Shielding Effectiveness in Conductive Nylon 6,6- and Polycarbonate-Based Resins 96
Quinton J. Krueger and Julia A. King

Preparation and Properties of Heat-Shrinkable Cross-Linked Low-Density Polyethylene 112
J. Morshedian, H. A. Khonakdar, M. Mehrabzadeh, and H. Eslami

Continuous Production of Ultrathin Polymeric Nanofilms Using the Spontaneous Film Formation Technique 120
Georg Hinrichsen, Andreas Hoffmann, Thomas Schleeh, and Christian Macht

Nanoparticles from a Controlled Polymerization Process 126
Vijaya R. Tirumala, Gerard T. Caneba, Yadunandan Dar, Hsien-Hau Wang, and Derrick C. Mancini

Processing Characteristics of PET/PEN Blends, Part 1: Extrusion and Transesterification Reaction Kinetics 137
Sriram R. Tharmapuram and Saleh A. Jabarin

Processing Characteristics of PET/PEN Blends, Part 2: Rheology and Degradation Kinetics 147
Sriram R. Tharmapuram and Saleh A. Jabarin

Processing Characteristics of PET/PEN Blends, Part 3: Injection Molding and Free Blow Studies 155
Sriram R. Tharmapuram and Saleh A. Jabarin

DEPARTMENTS

News from the Polymer Processing Institute 168

Number 3, Fall 2003

FEATURES

Rheological Properties of LDPE Processed by Conventional Processing Machines 179
Masayuki Yamaguchi, David B. Todd, and Costas G. Gogos

Prediction of Cooling Time in Injection Molding by Means of a Simplified Semianalytical Equation 188
D. M. Zarkadas and M. Xanthos

Binary Blends of EVA and Metallocene-Catalyzed Ethylene-α-Olefin Copolymers and Their Film Properties 209
Marianna Kontopoulou, Leo C. Huang, and Jennifer A. Lee

Improved Polyurethane Dispersion Stability via Continuous Process 218
Majid Keyvani

Secondary Gas Penetrations in Ribs During Full-Shot Gas-Assisted Injection Molding 225
Sen-Yeu Yang, Chui-Te Lin, and Jer-Haur Chang

Experimental Determination of Gelation and Swelling Parameters Using Time-Resolved Fluorescence Technique 238
Ö. Pekcan, D. Kaya, and M. Erdoğan

Thermoresponsive Poly(*N*-isopropylacrylamide-co-*N*-vinylimidazole) Hydrogels by Redox Polymerization 246
Belma Işik

Swelling Behavior of Poly(*N*-vinyl-2-pyrrolidone) and Poly(*N*-vinyl-2-pyrrolidone)/$K_2S_2O_8$ Hydrogels in α-Lactose Solutions 252
Hatice Kaplan Can, Serap Kavlak, Betül Kirci, and Ali Güner

DEPARTMENTS

News from the Polymer Processing Institute 260

Number 4, Winter 2003

FEATURES

Simulation of Heat Transfer During Rotational Molding 271
A. Greco, A. Maffezzoli, and J. Vlachopoulos

Rotational Foam Molding of Polypropylene with Control of Melt Strength 280
Remon Pop-Iliev, Fangyi Liu, Guobin Liu, and Chul B. Park

Influence of Melt Drawing on the Morphology of One- and Two-Step Processed LDPE/Thermoplastic Starch Blends 297
F. J. Rodriguez-Gonzalez, N. Virgilio, B. A. Ramsay, and B. D. Favis

Investigation of Mold Plate Separation in Thin-Wall Injection Molding 306
Shia-Chung Chen, Wei-Liang Liaw, Pao-Lin Su, and Ming-Hsiu Chung

Two-Phase Flow in a Gas-Injected Capillary Tube 320
Chan-Seok Park, Sang-Youp Baek, Ki-Jun Lee, and Seong Woo Kim

Cure Kinetics and Properties of Epoxy Resins Containing a Phosphorous-Based Flame Retardant 329
M. Frigione, A. Maffezzoli, P. Finocchiaro, and S. Failla

The Effect of Boron Nitride Particles and Hot-Pressed Boron Nitride Die on the Capillary Melt Flow Processing of Polyethylene 343
Sang Myung Lee, Gi Joon Nam, and Jae Wook Lee

Novel Methacryloylamidophenylalanine Functionalized Porous Chelating Beads for Adsorption of Heavy Metal Ions 355
Ridvan Say, Sibel Emir, Bora Garipcan, Süleyman Patir, and Adil Denizli

Evaluation of UV Inhibitors in Polyester Gelcoats 365
Cezar Capanescu and Corneliu Cincu

Interlaminar Shear Strength of Polycarbonate-Toughened Epoxy Composites Reinforced With Glass Rovings 373
A. Varada Rajulu, G. Babu Rao, L. Ganga Devi, Perugu Jithendra Balaji, Jiasong He, and Jun Zhang
